

BORRIQUITO

Vin de France

The Cinsault plot is located in an area with a very cool microclimate which offers wines both freshness and drinkability. Because Borriquito did not have much ageing, its concentration of alcohol is very low (and super easy to forget about!)

Production region : Languedoc

Village of Argelliers , eastern part of the AOC Terrasses du Larzac.

Soil : limestone

Grape variety : 100% Cinsault

Harvest : manual

Vintage : 2019

Alcohol : 11,5 %

To be served : 12-14°C

Elaboration process :

With its whole bunch fermentation in stainless steel tanks relying on native yeast, this pure Cinsault isn't filtered nor refined. It contains low levels of sulfite (less than 30mg of SO₂ per liter)
